

RAILTECH ALIGNMENT PLATES

The Railtech Alignment Plates make it possible for the welder to accurately align the rails through lift, twist and horizontal adjustment. The towers enable the rail to move vertically and reduce twist, while the base of the rail sits on the rail-saddle to stabilize and adjust by shifting horizontally.

The towers for the Railtech Alignment Plates are removable, allowing the user to easily situate the base plate under the rail base for quick set-up and convenient storage. The foot of the tower is grooved, which allows for a more stable and sturdier grip into the tie.

The design of the Railtech Alignment Plates allows the user to replace individual parts as needed, rather than replacing the entire Railtech Alignment Plate.

- HEIGHT: 5"
- LENGTH: 16 $\frac{3}{4}$ "
- WIDTH: 5"
- REMOVABLE TOWERS
- EASY INSTALLATION AND REMOVAL
- PART NUMBER: AP-1
